The Winner in the All America Vegetable Selections for 1946

Bush Bean

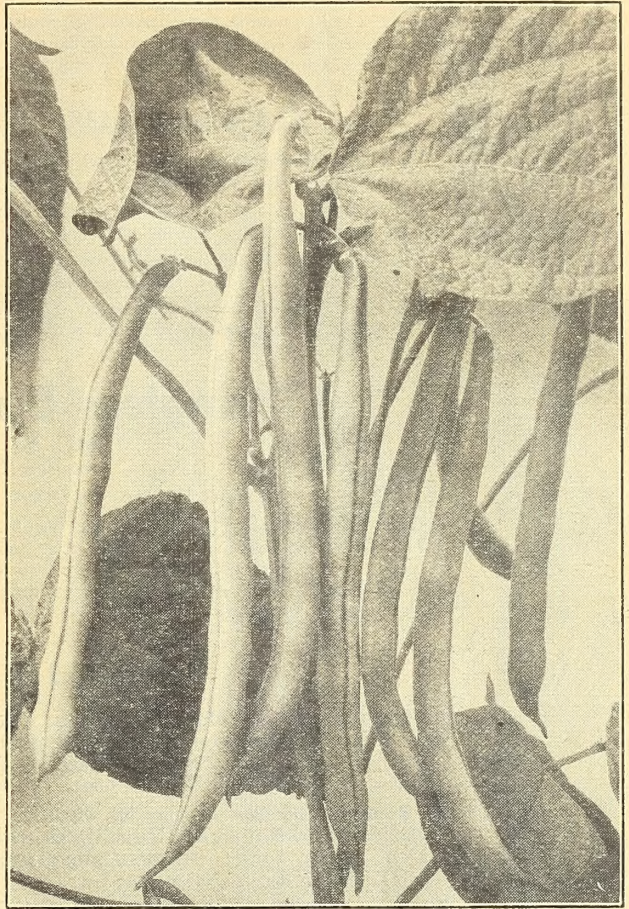

35 LONGREEN★

*The Only New Vegetable
Which Received an Award
In the 1946 Selections*

LONGREEN is an outstanding new Bush Bean which begins to bear in about 56 days after planting and continues to provide heavy picking for some time to come if planted in good rich soil. It combines choicest quality, delightful flavor, rich green color, tender flesh, and complete absence of strings or fiber at all times. The round pods are fleshy, straight, and measure 7 inches in length so that it is an inch longer than the variety Tendergreen which it resembles in most other respects.

LONGREEN is as attractive as it is delicious while the great length of the pods is clearly reflected in the high yield. It is a splendid variety for the home garden, for market, and for canning if broken up.

May we suggest that you order early because we expect a very strong demand. Pkt. 15c; ½ lb. 40c; lb. 75c; 2 lbs. \$1.40; 5 lbs. \$3.15 postpaid.

Bush Bean, Longreen

Three Outstanding All America Winners of 1945

26 Bush Bean, Improved Commodore ★

65 days. Beautiful, long, straight, round pods which are tender and of excellent flavor, borne abundantly on plants 16 inches tall. Always entirely stringless and free from fiber. It replaces Commodore, introduced in 1938, which had to be withdrawn because splitting of the seed prevented the production of viable seeds for planting. Pkt. 15c; ½ lb. 35c; lb. 60c; 2 lbs. \$1.15; 5 lbs. \$2.25, postpaid.

108 Bush Lima Bean, Fordhook 242 ★

75 days. Wherever the crop of the regular Fordhook Bush is adversely affected by hot summer weather this new **Fordhook 242** is the variety to be chosen. It resembles Fordhook with its large, thick-seeded pods which contain 3 or 4 nutty-flavored beans each but the plants have more foliage than regular Fordhook and will set pods in abundance during hot, dry summer weather. The early yield also exceeds that of Fordhook. Pkt. 15c; ½ lb. 35c; lb. 65c; 2 lbs. \$1.25; 5 lbs. \$3.00, postpaid.

106 Bush Lima Bean, Early Market ★

68 days. A beautiful large, flat-seeded variety which is bound to replace Burpee Bush because of its earlier maturity and the attractive green color of the beans when ready for table use. The pods are smooth, quite straight, of a dark green color and average over 4 inches in length; with 3 or 4 attractive beans of choicest flavor. Valuable for the home garden and for market. Pkt. 15c; ½ lb. 35c; lb. 65c; 2 lbs. \$1.25; 5 lbs. \$3.00 prepaid.

Dreer's Onion Seed

Ognon, FR.
Cipolla, ITAL.

Cebolla, SP.
Zwiebel, GER.

Treat seed with Arasan or Semesan

1 Pkt. for 25 ft.; 1 oz. for 100 feet
5 to 6 pounds for an acre.

Culture—Seeds may be sown early in the spring in rows 18 inches apart, and as soon as seedlings are 3 to 4 inches tall they should be thinned out to stand 3 to 4 inches apart in the row. Pull when tops begin to die down, cure, and use, or store in a cool, dry place. By sowing seed of the Spanish type, such as Prizetaker and the Southport Globes, under glass in February or March and transplanting in April to open ground 3 to 4 inches apart in the rows bulbs of immense size may be produced.

The Best Red Onions

The red-skinned Onions are by far the best winter keepers lasting well into the spring, well beyond the time that any of the white or yellow varieties could be kept in good condition. They mature rather late, have solid flesh, and their flavor is stronger than that of any others.

580 Large Red Wethersfield. 110 days. A well-known variety with very large thick flat onions having a bright purplish red skin. Solid flesh, shaded pink near the skin. Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.50.

582 Southport Red Globe. 120 days. The Southport Globe Onions are all very popular and this splendid red-skinned variety is no exception. The onions are perfectly round and have an attractive red skin and white flesh. Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.50.

The Leading White Sorts

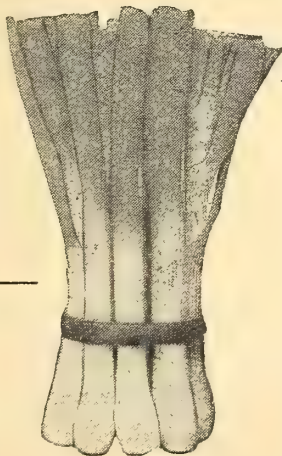

The white-skinned onions are much milder in flavor than yellow or red ones but they do not keep so well.

584 Southport White Globe. 120 days. A well-known standard sort of medium size, perfect globe shape, with pure white skin. White, fine-grained flesh of excellent flavor. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.10.

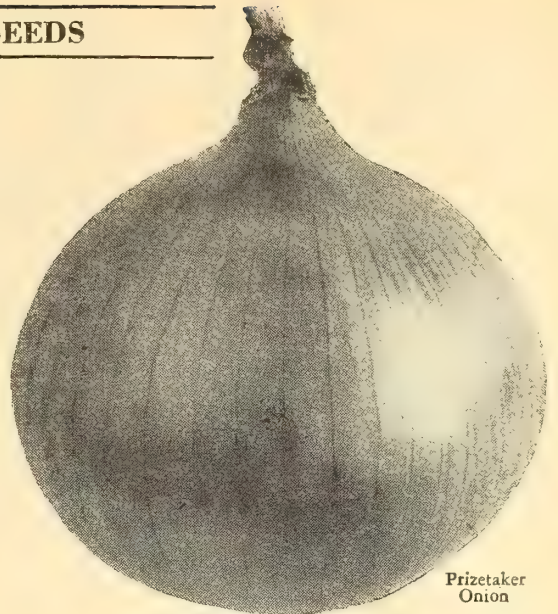

590 White Portugal or Silver Skin. 100 days. Attractive large, flat, pure white onions. A good keeper, also valuable for pickling and bunching. Fine-grained flesh of mild and pleasant flavor. Pkt. 10c; ½ oz. 25c; oz. 45c; ¼ lb. \$1.65.

594 White Sweet Spanish. 110 days. By far the largest of the globe-shaped white varieties. It resembles in form and size the pale yellow Valencia except that the color of the skin is a pure transparent white. The flesh is firm yet tender and it has an exceptionally mild and sweet flavor. Under favorable conditions individual onions of astonishing large size can easily be grown. Even under average conditions they reach a large size, yet they always are of sweet mild flavor. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.10.

588 White Bunching. This variety does not form bulbs and it is grown exclusively for green onions or scallions. Sow the seed thickly in rows and earth up gradually to blanch the stalks as far up as possible. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.10.

571 Ebenezer. 120 days. If planted early and thinned properly, the bulbs will grow to medium size and keep extra well during the winter. They are somewhat flattened, of a dark yellow color with crisp, firm, pure white flesh of excellent flavor. When fully grown, the bulbs measure from 2½ to 3 inches in diameter. 586 Southport Yellow Globe. 120 days. A large, globular onion with yellow skin and white flesh of fine flavor. It is a late variety requiring a long season to come to maturity. Usually 120 days are needed from the time of sowing until harvest. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.10.

It's Easy To Plan Your Garden By Following The Symbols Used Throughout This Book

The symbols shown below with explanations will help you much to plan your garden. They stand out from the text and therefore make it easy to pick out the kinds suited to specific conditions.

[Ⓐ]=**Annual**. Annual flowers complete their life circle within one growing season. They must be sown every year.

[Ⓑ]=**Biennial**. These require two years to bloom. Seed sown during one season will produce flowering plants the second year. Occasionally they live longer than two years.

[HHP]=**Half-Hardy Perennial**. These cannot stand much frost but may be kept alive by bringing indoors, placing in the cold frame, or covering securely during the winter.

[HP]=**Hardy Perennial**. These last for several years, withstanding considerable frost provided the soil is well drained.

[TP]=**Tender Perennial**. Tender perennials may be kept growing throughout the year in the house or greenhouse. Many of them are showy bedding plants for a summer and fall display.

§=**Climbing Plants**. Climbing and trailing plants which are best grown with a support on which they can climb.

△=**Suited to Rock Garden**. Most plants suited to rock gardens are also desirable for dwarf beds and borders. The smaller the rock garden the smaller the plants should be.

⊙=**Suited to Semi-Shade**. Most plants suited to semi-shade also do well in a sunny exposure. Semi-shade means some sun for part of the day or a location where the plants receive ample indirect light from above.

●=**Suited to Shade**. Few plants do in dense shade but those marked in this way will be found quite satisfactory. There are no annuals which will bloom in deep shade.

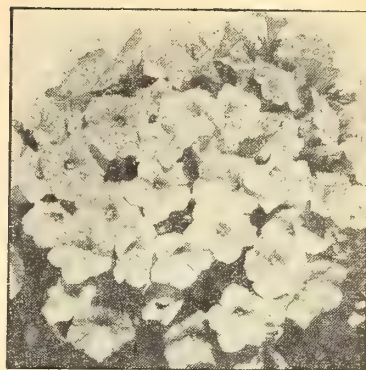

★ Seeds marked with a ★ often are sown in late fall outdoors to germinate the following spring. Spring germination is quickest if they are placed in water and set in the freezing chamber of an electric refrigerator. To secure the beneficial effect of alternate freezing and thawing, thaw them out once a week and then freeze again. They will be ready for sowing after two to three weeks of this treatment.

Marigold Sunkist

Petunia Igloo

All America Selections of 1943

Silver Medal Awards

Petunia [Ⓐ]

3412 America Alldouble

Distinctly different from all the older double Petunias,—100% true for doubleness. This was the first of the "All-double Petunias" originated in this country to be offered to American gardeners. The plants branch freely but retain a desirable compactness. They grow about a foot tall and make a showy circular cushion 18 in. in diameter. The flowers measure up to 2¼ in. in diameter and are an appealing sparkling rose-pink color. The small mid-green foliage has little stickiness. Pkt. 50c; large pkt. \$2.25.

Marigold [Ⓐ]

Dwarf Double French 2944 Sunkist

The plants of this Silver Medal winner greatly resemble those of Butter Ball which was introduced in 1943. They are of compact, dwarf growth and therefore highly desirable for dwarf beds and borders, yet the individual flower stems are long enough to permit artistic arrangement of the flowers in vases of moderate size. Sunkist belongs to the Harmony type of Marigolds and has attractive double rich orange blooms. Pkt. 15c; large pkt. 40c; ¼ oz. 60c.

Petunia English Violet

Cosmos Dazzler

Bronze Medal Award

3308 Petunia, Dwarf Compact Igloo [Ⓐ]

They are a pleasing creamy white with a more pronounced yellow tint in the throat. Pkt. 25c; large pkt. 75c.

Honorable Mention

Single Bedding Petunia [Ⓐ]

3332 English Violet

This belongs to the hybrida nana class and adds a delightful new color to this valuable group—a bright purple-violet of velvety richness, set against a dense mass of bright green foliage which sets off the flowers to good advantage. Pkt. 15c; large pkt. 60c.

Cosmos, Giant Sensation [Ⓐ]

2046 Dazzler

Like the other Sensation Cosmos this new variety exhibits a splendid combination of earliness, vigor, and size of flowers. The well-formed, broad-petaled blooms are an appealing deep amaranth crimson. They measure 3 to 4 inches across. Pkt. 15c; large pkt. 30c; ¼ oz. 60c.

Aster Navy Blue

Aster [Ⓐ]

1302 Extra-Early Navy Blue

Elegant large flowers in form not unlike those of the Giant Crego Aster but blooming considerably earlier. The individual flowers measure about 4 in. in diameter and are a deep velvety purple with the blooms well displayed on plants 20 in. tall. Pkt. 25c; large pkt. 75c.
